

HOANG MINH THANH

Junior Python Developer

 <https://hmthanh.github.io>  +849 1347 2506  hmthanhgm@gmail.com

Summary: I'm graduated student have solid background knowledge about Object-oriented Programming Algorithm and Data Structure in University of Science. Proficient C++, C#, Beginner in Python, fluent in Jquery, AJAX, Bootstrap 3,4 and good coding style . I would like opportunity to work, self-improvement in your company.

EDUCATION

Ho Chi Minh City, Vietnam

VNU-HCM, University of Science Sep 2012 – Sep 2015

- College in Information Technology

HONORS & AWARDS

- **Incentive** Award in The Good Chemistry District Student Contest 2009
- **Second Round** Thach Thuc, Faculty of Information Technology, HCMUS 2013, 2014

SKILLS

1. KNOWLEDGE & CONCEPT

- Background: [Solid Data structure and Algorithm](#), Object-oriented Programming, Design Pattern (Observer, Factory,...)
- English : Intermediate written and spoken English
- Code versioning tools : Proficient in Git, Github, Gitlab and Jira
- Machine Learning and Deep Learning : Linear regression, Logistic regression, SVN
- Cloud : A bit experience of AWS (S3, EC2, RDS, Route53, Elastic Beanstalk and AWS Sagemaker)
- Other: WordPress, Heroku , Photoshop, Adobe AE

2. LANGUAGE & FRAMEWORK

- C/C++ (3 years exp) : Data Structures, Class Template, pointer, References, OpenCV 4
- Python : PEP 8, Tuples, Dictionaries, Anonymous Functions, ..., numpy, pandas, matplotlib
- ReactJS : Component Lifecycle, Redux, redux-thunk, React Router, React Hooks, React Helmet, HOCs, Error Boundary, webpack, CSS-module,
- Database: Good Experience with MS SQL, MySQL
- HTML, CSS, Bootstrap, AJAX, jQuery
- Experience in Django, Flask, ASP.NET MVC , NodeJS

WORK EXPERIENCES AND PROJECT

- **VNU-HCM University of Science** 2012 – 2015
 - [BietDoiSieuLapLanh](#) : Redesign and customize a template website. I make it even before learn how to code
 - Caro Terminator (Self-study) : Basic AI game base on Min-max algorithm on Window Phone using WPF, XAML
 - ThuXinh : PHP website of final project
 - Pucca Runner (Self-study): A Unity game with funny idea of Dijkstra Algorithm ([Play Online here](#))
- **XEP Company** (ASP.NET Developer) 2018-2019
 - Create, customize implement and optimize SQL Query base on requirement
 - Develop absolute both front-end and back-end a commercial website

- Investigate library to implement image processing of QR code image
- **Rakumo Co., Ltd** (Python Developer) 2019 - Feb 2020
 - Maintain Django Website for Japanese Customer
 - Working with team to developing new feature, analyze requirements, estimate implementation, investigate new technology and apply to product.

CERTIFICATIONS

- **Support Student Examination Certification** Aug 2014 – Oct 2014
- [Emotion Recognition Certification - HCMUS](#) Nov. 2019
- Coursera: Machine Learning
